

BABYNEST / BABY FLAP

When choosing the location, care was taken to ensure that the baby nest is not visible to outsiders and is not easily observed by other buildings. The north-east side of staff house 2 is the location. The path to the baby nest is signposted in the outdoor areas. It consists of a heated room in the side wing of the hospital, with its own entrance. The room is divided by a glass front; a window can be opened. Behind it is the actual nest, a heat bed with a constant 37 degrees Celsius.

For the mother, there is a stamp pad on the open window with which she can make a footprint or handprint of her child. An information sheet for mothers gives the telephone number of the children's department in the hospital of the Merciful Sisters and provides information on information and advice options, free and anonymous examinations for mothers, social facilities, women's shelters etc.

BABY ALARM IN THE CHILDREN'S DEPARTMENT

Opening the window triggers a signal in the children's room. The pediatrician on duty in the house will be notified and will go to the baby nest to fetch the baby. The mother can leave without being recognized.

In the meantime, all the precautions are taken in the infant department so that the child can be cared for medically and without delay. As important as medical care is; It is even more important to take care of the children, to welcome them in the truest sense of the word and to convey security.

If a baby is admitted, there is absolute confidentiality for all employees of the hospital.

DIRECTIONS

Coming from Hohenzellerstrasse, turn right after the hospital car park from the roundabout; Coming from above, turn left to get to Alte Hohenzellerstraße. There are two barriers at the staff house and the baby nest is already clearly signposted.
